Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Friday 12 Nov 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Rather cloudy and windy with some rain at times.

Today:
Cloudy, damp and breezy during the morning. Tending to become windier, with spells of rain becoming heavier and more widespread for a time. On the mild side, but feeling rather cool given the unsettled conditions. Maximum temperature 13 deg C (55 deg F).

Tonight:
Cloudy, damp and windy at first, however both the wind and rain should ease later. Clearer and colder to end the night, with ground frost possible in prone rural spots. Minimum temperature 1 deg C (34 deg F).

Saturday:
A brighter day than on Friday for many, but probably remaining on the cloudy side, with coastal districts probably most prone to lingering cloud and a few light showers. Maximum temperature 13 deg C (55 deg F).

Outlook for Sunday to Tuesday:
Periodically rather cloudy as bands of mostly light rain stall and die away over the region. Some chilly starts likely given lighter winds, eventually becoming breezier later Tuesday.
